Git Assignment

For this assignment, I have created the below repository
 https://github.com/arunds/springboot-git.git

Create New Repository and Push to the Remote Repo

springboot-git>git init
springboot-git>git add .
springboot-git>git commit -m "commited with target folder"
springboot-git>git remote add origin https://github.com/arunds/springboot-git.git
springboot-git>git push -u origin master

Delete Target Folder

springboot-git>git rm -r target
springboot-git>git commit -m "Removed target directory"
springboot-git>git push -u origin master

Create wecomeapi Branch

springboot-git>git branch welcomeapi
springboot-git>git checkout welcomeapi
springboot-git>git add src/main/java/com/techinstance/git/HelloController.java
springboot-git>git push -u origin welcomeapi

Merge branch to master

springboot-git>git merge welcomeapi
springboot-git>git push -u origin master

Delete Branch
springboot-git>git branch -d welcomeapi
springboot-git>git push --delete origin welcomeapi
